

How To Use Your Snug Bug Bag With your **stroller/jogger/trailer**:

- 1) put your child into the stroller/jogger/trailer...don't buckle yet!
- 2) slip the Snug Bug Bag up around your child's legs...sleeping bag style, with the label in front
- 3) pull the bottom buckle through the slit in the Snug Bug Bag
- 4) fold the top part of the Snug Bug Bag down over the outside (so the inside color is visible) so that it's lower than child's armpits
- 5) tuck the side flaps behind child's back
- 6) put your child's arms through the shoulder straps as you normally would and connect the three points or five points of the harness over the top of the Snug Bug Bag!

How To Use Your Snug Bug Bag With a front-worn **baby carrier**:

- 1) put your baby carrier on, put your child in and get comfortable
- 2) with the label facing out, slip the Snug Bug Bag up and around your child's feet, as if you are pulling a sleeping bag up around the legs
- 3) pull the back part of the Snug Bug (the shorter piece) up as high as it will go between you and your child
- 4) either pull the front/top part of the Snug Bug up as high as the Baby Bjorn in front or fold it over itself so the top part of the baby carrier is visible
- 5) tuck the velcro-ed side flaps around the baby carrier and secure between the baby carrier and you

warm wash, no bleach,
air dry or warm dryer
